## FALKLAND ISLANDS, SOUTH GEORGIA, ANTARCTICA

# DISCOVER SPRING IN SOUTH GEORGIA

On this far reaching expedition to the sub Antarctic islands and the Antarctic Peninsula you will revel in 19 eye popping days of exploration. Busybody penguins in rookeries by the thousands (we hope to see up to 8 different species), rare seabirds (Wandering, Blackbrowed, and Sooty Albatross) on the nest and in flight, behemoth icebergs reflecting startling greens and blues, humpback, fin and sei whales, not to mention the continent-sized sweeping ice sheet of Antarctica. Exploring these remote islands in the Austral spring allows the unique opportunity to watch as the colonies come to life following the spring thaw. Your experience is rounded out by participating in our educational program which covers the history, geography, and wildlife. And should your interest diverge towards more luxurious tendencies, feel free to relax with a professional massage, indulge in a hot tub on deck, or treat yourself to a glass of bubbly in your own special spot. Whether onboard or ashore, opportunities abound to learn, grow, experience, hike, paddle, cruise, camp and interpret on this extensive 19 day foray into the southern ocean.
